

Why Choose LP® SmartSide®?

LP SMARTSIDE®
BUILDING PRODUCTS TRIM & SIDING

LPSmartSide.com

BUILD WITH US®

We protect great homes and great reputations.

The LP SmartSide family offers a complete line of exterior trim and siding products – including lap, panel, trim, fascia and soffit – that are engineered using advanced siding technology to give homebuyers the traditional look of real wood, while helping to protect their homes from harsh weather conditions and termites. Every step of the manufacturing process is designed to create a high-performance product that's tough and durable, so it performs beautifully for decades.

How Will It Hold Up?

Independent Testing at NASA Laboratories

For the baseball projectile, surface scans were not conducted due to the extensive damage to the fiber cement siding samples. Tests NASA-LVG733 and NASA-LVG731 were compared visually. The impact velocities were 72.8 mph for the fiber cement siding sample and 77.7 mph for the LP siding sample. The fiber cement siding sample sustained a large hole and backside spalling. There was no visual evidence of damage in the LP sample.

The SmartGuard Difference

WAXES

Special water-resistant waxes coat each strand or fiber of wood for enhanced durability in rainy, humid environments.

RESIN-SATURATED OVERLAY

Offering the final layer of protection against the elements, a resin-saturated overlay resists liquid intrusion while providing a durable base for quality paint adhesion and beauty.

ADVANCED BINDERS

LP SmartSide Trim and Siding provide incredible strength to resist impact damage thanks to their industrial-grade binders and resins. You'll have the confidence of knowing that your siding can stand up to everyday airborne debris such as sticks and golf balls.

ZINC BORATE

Engineered wood products treated with zinc borate have been proven to effectively resist damage from termites and fungal decay for decades. Safe for children and pets, this naturally occurring additive provides long-lasting performance that preserves the beauty of LP SmartSide Trim and Siding.

Superior Workability

A Smarter Way To Work

LP® SmartSide® trim and siding is lightweight and easy to handle on the job site. It also cuts easily with standard woodworking tools, so there are no special blades or silica dust to deal with. Plus, each piece of LP SmartSide trim is free of knots and voids, which helps speed up installation time and helps reduce callbacks.

Simple To Install

- Lighter and less breakage than fiber cement
- Silica-free and cuts with standard woodworking tools
- Longer lengths that are always free of knots and voids
- Factory primed for superior paint adhesion and reduced labor

Durable Beauty

Sustainability

[LPSmartSide.com](https://www.lpsmartside.com)

BUILD WITH US®

LP® SmartSide® trim and siding is made of wood, a renewable resource. Our manufacturing process creates minimal waste. Our wood is procured using SFI® certified forest management and fiber sourcing systems. Ultimately, LP SmartSide trim and siding helps you preserve our valuable natural resources while building beautiful homes that last.

Building with LP SmartSide

- Comes in lengths up to 16 feet for less waste
- Reduces waste on the jobsite
- Manufacturing efficiencies help conserve resources
- Warranted to perform for decades
