

QUEST  PREMIUM VINYL SIDING • LONG LENGTH PANELS

Mastic products are backed by Ply Gem — a 75-year leader in pioneering performance home exteriors, with a superior warranty for exactly the home you want for decades to come. Homeowners can feel confident knowing Ply Gem always goes the extra mile. From innovative engineering to trend setting design and industry leading warranties, we're a company you can trust with products you'll love.

THIS PAGE: Quest Double 5" in Pebblestone Clay with Cedar Discovery Double 7" Perfection Shingle in a custom color
COVER IMAGE: Quest Double 4" in Everest

Quest Double 4" in American Walnut

No paint. No stain. No hassles. A premium vinyl siding with the classic look of authentic wood siding. Solid and tough. A tornado-tough, double-thick nail hem that keeps siding firmly in position, even during high winds. Patented T3-LOK® panel locking system eases installation and increases strength. Quest®. Incomparable beauty. Unmatched performance.

VINYL SIDING GIVES HOMEOWNERS WHAT THEY WANT.

■ IMPORTANT ■ NEUTRAL ■ NOT IMPORTANT (%)

(independent study conducted by Vernon Research Group, 2005)

Is it any wonder that vinyl siding is chosen more than any other exterior cladding in the U.S. and Canada?¹

Quest Delivers.

DURABILITY. If you're looking for siding that is durable and low maintenance, and looks beautiful, Quest siding is the ideal choice. Quest will enhance your home's appearance today — and for years to come.

NO PAINT, NO STAIN, NO HASSLES. Quest, a premium panel, never needs paint or stain. Unlike real wood siding, it won't crack, peel, flake or rot. Revolutionary technologies like Ply Gem's exclusive Hang-Tough™ Technology, Kynar 500® Protection and Duranyl 5000® Protection System maximize the panel's weatherability and deliver additional protection — and peace of mind — for your investment.

COLOR AND TEXTURE. Featuring a realistic cedar grain, Quest is available in a diverse palette of attractive colors — 35 base colors from rich, deep hues to light neutrals.

PEACE OF MIND THAT LASTS A LIFETIME. Quest is backed by the V.I.P. Limited Lifetime Warranty. Please see our warranty for complete details.

Beauty that lasts. Based on an average-size home, repainting or staining can cost up to \$6,000 every four years. Quest never needs painting, caulking or patching because, unlike wood, it won't crack, peel, rot or split.

NO PAINT. NO STAIN. NO HASSLES.

TYPICAL SAVINGS
IN PAINTING COSTS

THE SAVINGS ADD UP

HANG-TOUGH™ TECHNOLOGY

Exclusive formulation and process boosts durability so panels are more resistant to cracking, impact and thermal distortion. As an added benefit, rich color resides throughout the panel — virtually eliminating the appearance of nicks and minor surface scratches.

DURANYL 5000® PROTECTION SYSTEM

Proprietary technology adds extra UV protection to our deepest, most vivid colors — protects color against harsh elements and maximizes long-term weatherability.

KYNAR 500® PROTECTION

Our cedar colors feature an exclusive thermal bonding process utilizing weather-resistant polymers and Kynar 500® to create a protective coating with superior weatherability and color retention.

PEACE OF MIND.

V.I.P. LIMITED LIFETIME WARRANTY

Premium guarantee of lasting quality and peace of mind — backed by Ply Gem, a trusted industry leader for 75+ years. See warranty for complete details.

BREATHE EASY

Unlike some fiber cement products, vinyl siding does not produce harmful silica dust — silica dust can cause lung disease.

Test our vinyl. We do. Rigorously. Relentlessly.

OIL CAN TEST Siding panels are placed under heat strips and saturated to 120°-140°F to make sure the siding doesn't warp or buckle.

WEATHERING Color retention (resistance to fading) is tested by subjecting Mastic products to real-time weather conditions and accelerated UV testing. This ensures that Mastic products will hold up in the most extreme environmental conditions.

RIGIDITY Panels are designed and engineered to be more rigid so the siding remains straight on the wall.

COLOR READ TEST Using a spherical spectrophotometer, a 10,000 watt xenon flash tube bounces light off a siding panel. This information is then analyzed to determine if the color falls within accepted ranges for color consistency and match.

VERTICAL HEIGHT IMPACT TEST Measures the product's durability and ability to resist impact forces — the result of proper thickness, formulation and impact modifiers.

GLOSS TEST A digital readout microgloss meter is used to scan siding to determine if its gloss falls within a target range. Gloss is important to the aesthetic appeal of the siding.

Time-tested. Certified. And more.

The Vinyl Siding Institute (VSI) sponsors a certification program that assures the quality of vinyl siding by offering manufacturers the means to independently verify the quality of our products through third-party testing and inspection.

Through this program it was certified that Mastic vinyl siding products meet or exceed the performance standards set forth by ASTM D3679 and the color retention requirements of ASTM D6864/D7251, so you can have confidence our products will perform well, season after season.

ASTM STANDARDS		MASTIC BY PLY GEM PERFORMANCE	
	WITHSTAND THE IMPACT OF RECOMMENDED INSTALLATION PROCEDURES.		Mastic siding is designed and engineered to withstand impact beyond that required by ASTM D3679.
	STAY ON THE HOUSE IN HEAVY WINDS OF AT LEAST 110 MPH.		Quest is rated at up to 240 mph.
	LAY STRAIGHT ON A FLAT WALL AND NOT BUCKLE UNDER NORMAL CONDITIONS.		Our product development team subjects Mastic products to a battery of rigorous tests to ensure superior quality and performance and, in addition to lay-flat design features, some Mastic products are even designed to hide existing imperfections in construction.
	WITHSTAND THE EFFECTS OF NORMAL SEASONAL TEMPERATURE FLUCTUATIONS.		With our exclusive Duranyl 5000 [®] Protection System and Hang-Tough [™] Technology, Mastic products are engineered to persevere in the most extreme conditions.
	MEET MANUFACTURERS' ADVERTISED SPECIFICATIONS FOR LENGTH, WIDTH, GLOSS AND THICKNESS — AND HAVE A MINIMUM THICKNESS OF .035.		Quest features a premium nominal thickness of .046 — 31% thicker than the minimum requirement.

*Consult the VSI website at vinylsiding.org for a current list of certified products and colors.

We Go To Great Lengths For Beauty.

Quest Long Length and Super Long Length panels keep seams to a minimum, add aesthetic appeal, shorten installation time and reduce waste. It's a beautiful thing for homeowners and installers alike.

STANDARD LENGTH

← 12', 12' 1" and 12' 6" →

The image shows three horizontal panels of different lengths, stacked vertically. Each panel has a black arrow pointing left from its left end and a black line extending to the right, indicating its length. The top panel is labeled 'STANDARD LENGTH' and has a measurement of '12', 12' 1" and 12' 6"'. The middle and bottom panels are shorter than the top one.

Quest Long Length and Super Long Length Panels Keep Going.

It's simple math: longer panels mean virtually no seams. Through the efficient use of Quest Long Length (16' 8") and Super Long Length (25' 6") panels, you can greatly reduce — or even eliminate — the need for unsightly seams. The result is cleaner, straighter, more professional.

LONG LENGTH

16' 8"

SUPER LONG LENGTH

25' 6"

VIRTUALLY SEAM-FREE

Longer panels mean fewer seams. Compare standard length panels to Quest Long Length and Super Long Length Panels.

AVERAGE NUMBER OF SEAMS

**STANDARD LENGTH
PANELS MEASURE 12'**

SIGNIFICANTLY FEWER SEAMS

**LONG LENGTH PANELS
MEASURE 16' 8"**
One-third longer than
standard 12' panels

VIRTUALLY SEAM-FREE

**SUPER LONG LENGTH
PANELS MEASURE 25' 6"**
More than twice as long
as standard 12' panels

CHOOSE TRADITIONAL OR DUTCH LAP

Long Length (16' 8") and Super Long Length (25' 6") are available in Double 4" Traditional Lap and Double 4-1/2" Dutch Lap Panels.

AVAILABLE IN 25 BEAUTIFUL COLORS

Choose from our premium deep colors, classic palette or traditional lighter hues.

Standard Panels
End Here.

TRI-LINEAR RIGIDITY

Quest provides extra rigidity in three critical areas. Siding panels stay straight and true with 200% more rigidity than standard siding.

TORNADO-TOUGH, DOUBLE-THICK NAIL HEM

Fold-over nail hem features a projected stop and provides a stronger anchoring surface — siding stays firmly in place, even in high winds.

ENHANCED FULL 3/4" PANEL PROJECTION

Oversized to provide extra rigidity — and uniquely angled to create straighter, deeper shadow lines.

PATENTED T3-LOK

Panels grip together for fast, easy installation — uniquely designed lock tightens under pressure so siding stays put even in the most challenging weather.

NEW PREMIUM .046 NOMINAL THICKNESS

Superior thickness and impact resistance.

LONGER LENGTHS AVAILABLE IN DOUBLE 4" AND DOUBLE 4-1/2" DUTCH LAP — 16' 8" AND 25' 6"

Fewer seams — for a cleaner, straighter, professional look. Ideal for larger homes and light commercial applications.

WIND SPEED — RATED UP TO 240 MPH

Proprietary design and engineering delivers a panel that achieves superior wind resistance.

DURANYL 5000[®] PROTECTION SYSTEM

Proprietary technology adds extra UV protection to our deepest, most vivid colors — protects color against harsh elements and maximizes long-term weatherability.

EXCLUSIVE HANG-TOUGH™ TECHNOLOGY

Boosts durability so panels are more resistant to cracking, impact and thermal distortion. Color resides throughout the panel — virtually eliminating the appearance of nicks and minor surface scratches.

V.I.P. LIMITED LIFETIME WARRANTY

Premium guarantee of lasting quality and peace of mind — backed by Ply Gem, a trusted industry leader for 75+ years (see warranty for complete details).

RESOURCE EFFICIENCY

A HEALTHY RESPECT FOR THE PLANET — AND OUR CUSTOMERS.

Ply Gem can help you meet your sustainable building goals and earn points in leading green building certification programs. Our products offer features that positively contribute to sustainable practices, improved energy efficiency or lifecycle benefits of homes. All are foundation elements of sustainable building reflected in Ply Gem's Enviro initiative.

For more information on how Mastic products can help you meet your sustainable building goals, refer to our *Building to Make a Difference* white paper available at mastic.com.

SUSTAINABLE RESOURCES:

- Mastic vinyl siding is manufactured from two abundant natural resources: salt (57%) and natural gas (43%).¹
- During the manufacturing process of our vinyl siding, all unused material is reclaimed and reused, creating one of the most efficiently-produced exterior claddings available today.
- The Structure Home Insulation System™ has been third-party verified and Green Circle certified to contribute towards achieving LEED and NAHB credits, utilizing post-consumer and post-industrial recycled material.
- When installed and used properly, Mastic products never require paint or stain, which reduces VOCs released into the atmosphere.
- Mastic Performance Metals® have been third-party verified and Green Circle certified to contain a minimum of 67% recycled content.
- Ply Gem facilities reuse and recycle pallets and packaging material, reducing raw material needs and landfill use.

ENERGY EFFICIENCY:

- Vinyl siding requires less energy to manufacture per square foot than brick and mortar.²
- Mastic vinyl siding is lighter weight per square than other cladding options, so it requires less fuel to transport. Less fuel used means less pollution.
- When correctly installed, the Structure Home Insulation System™ can reduce thermal bridging and help meet the requirements of an ENERGY STAR® Qualified new home. The Structure Home Insulation System™ in a Double 6" profile has an R-value³ of R-3.0 using the testing method ASTM C1363, as specified by the Federal Trade Commission.
- Mastic Performance Metals® V-Groove soffit and roof and eave vents support proper attic ventilation efforts, which moderates attic temperatures and improves a home's energy efficiency. Mastic V-Groove metal soffit provides the most net free ventilation per linear foot of any aluminum soffit system.

¹ "A Dozen Things You Might Not Know That Make Vinyl Siding Green," page 9, Tad Radzinski, P.E., LEED AP, and VSI, October 10, 2009. <<http://www.vinylsiding.org/greenpaper/>>

² Ibid, page 10

³ R means resistance to heat flow. The higher the r-value, the greater the insulating power.

LIFECYCLE BENEFITS OF HOMES:

- Mastic vinyl siding is durable and requires no site finish. Our Performance Metals® stand up to weather with virtually no maintenance. Our Designer Accents™ use thicker construction and a baked lacquer finish to ensure that they hold up season after season.
- When installed properly and under normal use, our products should never require painting or staining. They won't crack, peel, blister, or rot.
- All of our Performance Metals® aluminum accessories are easily recyclable. In fact, at the end of its lifecycle in building applications, 100% of the aluminum can be recycled.

LEED For Homes — Possible Points

LEED New Construction — Possible Points

NAHB Standards — Possible Points

Looking for Mastic products with features that can contribute to overall energy savings, lower maintenance and reduced environmental impact? These logos identify products recognized by third parties as supporting green building practices.

Mastic supports green building and it shows. We are active members of both the USGBC and NAHB — two key organizations that are working to define sustainable building practices.

GIVE YOUR HOME THE PERFECT FINISH

The big things like siding and windows make the house, but it's the finishing touches that make it home. So start with the rich texture of shakes or the crisp shadow lines of lap siding, but finish with charming shutters, expertly crafted trim or rustic stone. Creating your dream home exterior can start and finish with Ply Gem. Every product we make is designed to perform and look beautiful together. Because a house is a home when it's **perfectly finished.**
