VINYL SOFFIT

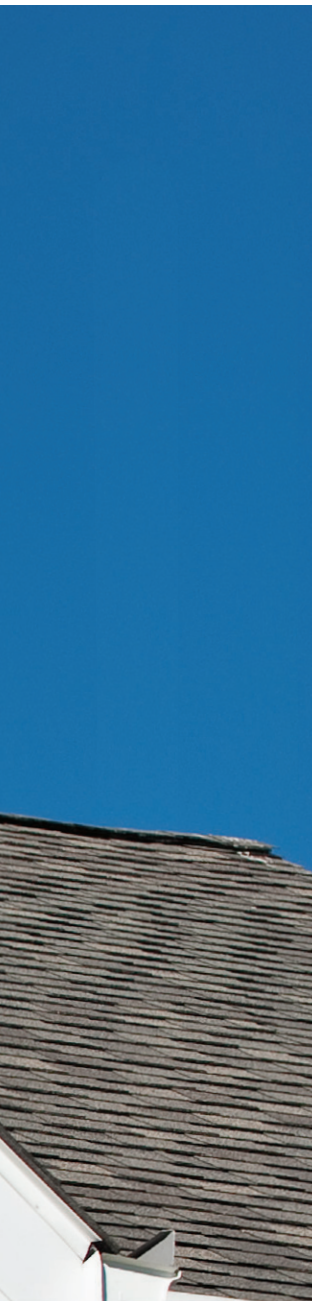

MAKE MORE POSSIBLE.

Ventura® Triple 3-1/3" Hidden Vent

VINYL SOFFIT

With Mastic vinyl soffit, you can extend the low maintenance beauty of Ply Gem up under the eaves — which helps avoid repainting and costly repairs in the future.

Easy to install, Mastic vinyl soffit is available in a variety of grades, styles and colors.

V.I.P. LIMITED LIFETIME WARRANTY

FASTER, EASIER INSTALLATION**

VINYL SOFFIT

VENTILATED SOFFIT — A KEY COMPONENT FOR A PROPERLY VENTILATED ATTIC.

A poorly ventilated attic is bound to have condensation problems. During hot weather, temperatures in an attic became super heated. Coupled with trapped moisture, this can lead to:

- Damp insulation (rendering it ineffective)
- Mold and mildew problems
- Rotted rafters and joists
- A shorter roof life

Plus, a super heated attic puts a heavy load on your home's cooling system. The solution is to ventilate your attic.

Our ventilated soffit allows outside air to flow through the attic and out louvers or vents in your roof.

VENTILATION HELPS PREVENT ICE DAMS IN GUTTERS.

In winter, an attic that is too warm melts snow off the roof. The ice melt then re-freezes at the gutters causing ice dams that can damage the roof and allow water to seep through the fascia. Ventilated soffit allows a natural flow of outdoor air to ventilate the attic, which helps keep it cooler in winter and reducing the potential for ice dams in gutters.

VENTILATED OR NON-VENTILATED. HIDDEN VENTS OR VISIBLE VENTS. IT'S YOUR CHOICE WITH MASTIC SOFFIT.

Whether you're looking to increase ventilation in an attic, reduce maintenance under the eaves or enhance the beauty of your home's exterior, we have a solution that's right for you. The unique design of Ventura soffit, for example, gives the appearance of a smooth profile with vents hidden out of sight. It's just one more example of Ply Gem innovation.

WHAT YOU DON'T SEE IS WHAT YOU GET

- Clear span design with few visible vents.
- Superior locking system stays secure under pressure.
- Rollover nail hem provides 160 mph windload.

NO HIDING THE FACTS: LESS IS MORE

The less you see of us, the more you'll like us. Our unique ventilation design, hidden deep within all six walls of the soffit panel, delivers up to 50 percent more ventilation than some competitor's hidden soffits. And better ventilation than standard soffit.

It's a whole lot more, with a whole lot less visible.
